- Addressed customer inquiries efficiently while ensuring comprehensive CRM documentation and case management.
- Utilized established support procedures to effectively resolve customer challenges, contributing to customer retention.

PointCircle Builders Inc.

Oct 2017 – Jun 2018

Technical Support Coordinator

- Configured office hardware and software, providing essential technical support to enhance operational efficiency.

- Supported internal users with technical issues, ensuring prompt resolution and minimal disruption to workflow.

PROJECTS

MASTER PLATFORM

Ongoing

Web Application Developer

- Developed a tourism-focused web application that supports client and travel-consultant user registration and login workflows using HTML5, Tailwind CSS, JavaScript, Node.js, Express.js, and SQLite.
- Designed responsive frontend interfaces with semantic HTML and Tailwind CSS, enhancing user experience on all devices.
- Created backend RESTful API endpoints using Express.js to enable efficient data retrieval and communication between backend and frontend components.
- Engineered a secure relational database structure with SQLite, implementing primary keys and constraints to ensure data integrity.
- Incorporated user authentication workflows utilizing bcrypt for secure password management, increasing application security.

IRMINUSL TERMINAL

Web Application Developer

- Developed a JavaScript-based application to organize and present game-lore data effectively.
- Applied DOM manipulation techniques and CSS Grid for structured and responsive data presentation, improving user interaction.
- Leveraged JavaScript logic for dynamic content display, enriching user engagement and experience.

EDUCATION

Rizal Technological University

Bachelor of Science in Computer Engineering
